

TAYYAB SARWAR

Python / Django Backend Engineer

Lahore, Pakistan | +92 346 4384959 | tayyabbasra434@gmail.com | linkedin.com/in/tayyab-sarwar

PROFESSIONAL SUMMARY

Python / Django backend engineer with **4+ years** designing and shipping scalable REST APIs and cloud applications. Delivered production systems across SaaS, healthcare logistics, sports data, and event-management platforms — including backends powering **AI-driven automation workflows**. Expert in API architecture, third-party integrations, asynchronous processing, and AWS deployment, with a proven record of turning client goals into reliable, well-tested software.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript (basic)
Frameworks	Django, Django REST Framework (DRF), FastAPI, Celery, Django Channels
Databases & Caching	PostgreSQL, Redis
Cloud & DevOps	AWS (EC2, S3, RDS, Route 53, ECS, ECR, Elastic Beanstalk), Docker, CI/CD, Git, BitBucket
Integrations	Stripe, Twilio, SendGrid, Zoom, Cronofy, SportsData, REST / Webhooks, OAuth / JWT
AI / Automation	LLM API integration, AI-assisted workflow automation

PROFESSIONAL EXPERIENCE

Python / Django Developer — [MentorSol Technologies](#), Lahore May 2024 – Present

- Build and maintain backend services across three production SaaS platforms (Quantuvos, Flite, Zoomlogi) using Django + DRF and PostgreSQL.
- Engineered real-time session scheduling and enrollment for a learning-management system, integrating **Zoom** and **Cronofy** for automated meeting and calendar workflows.
- Built ticketing, attendee, and analytics APIs with **Stripe** payments for an event platform, reducing manual event operations.
- Delivered the backend for an **AI-native healthcare-logistics control tower** enabling real-time shipment visibility and AI-automated intervention workflows.
- Partner with clients and cross-functional teams to define scope, ship features, and resolve production issues.

Python / Django Developer — [Kavtech Solutions](#), Lahore Sep 2022 – Apr 2024

- Designed and optimized the backend for Lineups.com, a high-traffic sports-statistics platform, building RESTful APIs and web services in Python / Django.
- Integrated **SportsData APIs** to deliver real-time sports data across the product.
- Optimized backend components for performance and reliability; led testing and debugging to ship stable releases.
- Deployed and operated services on **AWS** (EC2, S3, RDS, Route 53, ECS, ECR, Elastic Beanstalk).

Associate Software Engineer — [SpyreSync](#), Lahore Dec 2021 – Sep 2022

- Built Django applications and REST APIs with authentication, permissions, ViewSets, and ModelViewSets.
- Implemented background processing with **Celery + Redis** and real-time features via Django Channels / WebSockets.
- Integrated external services including **Twilio** and **AWS S3**.

Python Intern — [W-Group](#), Lahore Sep 2019 – Dec 2019

- Built Django projects from scratch; applied OOP, data structures, Git, and core Django (models, migrations, forms, admin).

KEY PROJECTS

- Quantuvos** — Backend for an online learning-management system: course creation, enrollment, and real-time session scheduling with automated Zoom / Cronofy workflows (Django, DRF, PostgreSQL).
- Zoomlogi** — Backend for an AI-automated healthcare-logistics platform with real-time shipment tracking (Django, DRF, AWS).
- Flite** — Event ticketing, Stripe payments, and analytics APIs.
- Lineups.com** — Real-time SportsData API integration at scale on AWS.

EDUCATION

BS Computer Science — Lahore Garrison University, Lahore • CGPA 3.39 • 2019
